The image features a clear blue sky with light, wispy clouds. A diagonal line divides the sky into two shades of blue. At the bottom, a portion of a roof with grey tiles and a gutter is visible. Several dark solar panels are mounted on the roof. The text 'solar co' is positioned in the upper left, with 'solar' in orange and 'co' in white with an orange outline. Below it, 'Domestic Solar' and 'PV Systems' are written in large white font. At the bottom left, the text 'for free electricity & hot water' is written in a smaller white font.

solar co

Domestic Solar PV Systems

for free electricity &
hot water

What is Solar PV?

Each panel is 1 metre in width, and 1.6 metres in length. A 4kW system will generally require 14 panels.

Key Benefits

SAVINGS

Reduce your electricity bills by around €600 per year*

WARRANTY

Minimum 25-year performance warranty

AVOID CARBON TAX

Avoid upcoming carbon taxes by using a clean energy source

GREEN

Generate your own clean, green, free electricity

MONITORING

Monitor your system's performance online as an optional extra

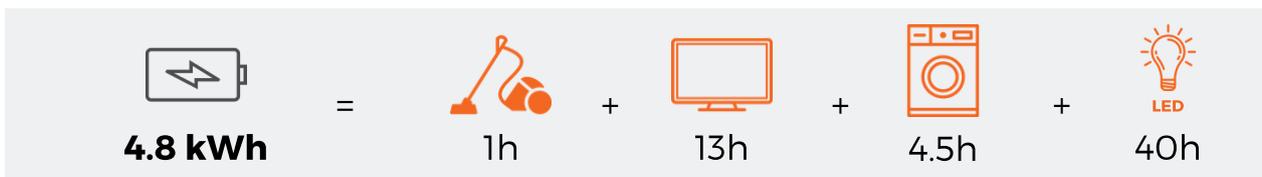

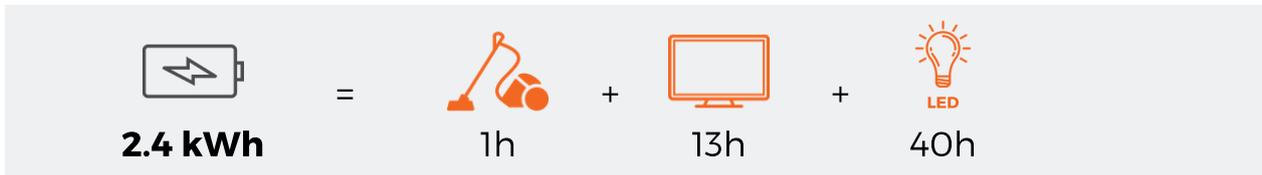

REFERRAL PROGRAMME

Tell your friends & get cash back with our referral programme

Battery Storage

The capacity of a storage battery is expressed in kilowatt hours (kWh).

1 kWh battery storage could power an appliance with an output of 1,000 watts for one hour. Here are some examples of what you can power with your battery.

Grants of up to €3,800 for domestic Solar PV

The SEAI are offering grants of €700 per kW of installed power, up to a maximum of 4kW, plus €1,000 for a storage battery, to homeowners with houses built before 2011. The grant conditions stipulate that any installation more than 2kW must install a battery.

	2kW (without battery)	3kW (without battery)	3kW (with battery)	4kW (with battery)	6kW (with battery)
Solar PV	€1,400	€1,400	€2,100	€2,800	€2,800
Battery	-	-	€1,000	€1,000	€1,000
Total	€1,400	€1,400	€3,100	€3,800	€3,800

We'll take care of the whole application for you – you needn't worry about a thing. With this grant, you can expect your payback time to be less than 6 years – saving around €600 per year on your electricity bills!*

*When installing a 4kW system

SolarCo is one of Ireland's leading Solar PV installers. Our goal is to help you futureproof your home and make huge savings on your electricity bill by generating your own free, clean electricity.

With reference sites across Ireland and hundreds of happy customers, you know that you can count on us for reliable and efficient service.
